Why these colleges rank where they do

A NIRF score is the weighted sum of five parameters, each marked out of 100. Two colleges with similar totals can be very different places to study, so it is worth reading across the row rather than only looking at the rank.

College	TLR 30%	RPC 30%	GO 20%	OI 10%	PERCEPTION 10%
All India Institute of Medical Sciences, Delhi	88.86	81.72	100.00	79.42	100.00
Maulana Azad Institute of Dental Sciences	82.45	43.39	98.65	56.03	94.65
Jamia Millia Islamia	83.56	24.38	63.37	85.30	59.17

TLR Teaching, Learning & Resources RPC Research and Professional Practice GO Graduation Outcomes OI Outreach and Inclusivity PERCEPTION Perception

Green marks a score of 70 or above; red marks below 35. Perception is scored from a survey of academics, employers and the public, so newer and regional institutions often score low there even when their teaching and outcomes are strong — read a low Perception number with that in mind rather than as a verdict on the campus.

How to use this list

- Entrance exams. NEET UG is the single route to BDS across India, for both the all-India quota and state quotas.
- A rank is not a ranking of your experience. NIRF measures the institution as a whole, not the individual department or specialisation. An institution ranked lower overall may still be the stronger choice for the one you want.
- Participation is voluntary. A good college missing from this list may simply not have submitted data. Absence is not evidence of poor quality.
- Bands hide detail. Inside 101–150 or 201–300 the colleges are listed alphabetically, so position in that list carries no meaning at all.
- Check the year. These are the India Rankings 2025 figures, released September 2025. The 2026 edition is expected later in 2026 and will supersede them.
