Comprehension:

Unquestionably a literary life is for the most part an unhappy life, because if you have genius, you must suffer the penalty of genius; and if you have only talent, there are so many cares and worries incidental to the circumstances of men of letters, as to make life exceedingly miserable. Besides the pangs of composition, and the continuous disappointment which a true artist feels at his inability to reveal himself, there is the ever-recurring difficulty of gaining the public ear. Young writers are buoyed up by the hope and the belief that they have only to throw that poem at the world's feet to get back in return the laurel-crown; that they have only to push as a new light in literature. You can never convince a young author that the editors of magazines and the publishers of books are a practical body of men, who are by no means frantically anxious about placing the best literature before the public. Nay, that for the most part they are mere brokers, who conduct their business on the hardest lines of a profit and loss account. But supposing your book fairly launches, its perils are only beginning. You have to run the gauntlet of the critics. When you are a little older, you will find that criticism is not much more serious than the bye-play of clowns in a circus, when they beat around the ring, the victim with bladders stung at the end of long poles. A time comes in the life of every author when he regards critics as comical rather than formidable, and goes his way unheeding. But there are sensitive souls that yield under the chastisement and, perhaps after suffering much silent torture, abandon the profession of the pen forever.

Comprehension:

Direction : Read the passage given below and answer the questions (Q. Nos. 141 to 145) that are based on your understanding of it :

Civil war differs radically from both international war and communal violence. Unlike international war, it is fought outside any structure of rules and entirely within the territory of the society. Unlike communal violence, it implies a rebel organization equipped with armaments and staffed with full-time recruits. Such rebel armies usually have little option but to live off the land. These features typically escalate the social costs of civil war above the costs of either international war or communal violence. For example, the same conflict between Eritrea and Ethiopia generated both a civil war and, following Eritrean independence, an international war. As a civil war the conflict lasted for 30 years and was ended only by military victory. As an international war the conflict was subject to the full panoply of international mediation and ended swiftly in a negotiated settlement. To analyse civil war we need to know what we mean by it. We adopt a precise but conventional definition : civil war occurs when an identifiable rebel organization challenges the government military and the resulting violence results in more than 1,000 combat-related deaths, with at least 5 percent on each side. There are many other forms of group violence, such as protests, riots, and programs, but we do not consider them here.

The perpetrators of civil war usually adopt the rhetoric that the war is a necessary catalyst for social progress. Occasionally this is right, but more typically war is an economic and social disaster for the affected country. Therefore, for those who care about development, civil war is a major problem.

In the past two decades, India has undergone dramatic transformations in the economic, social and political spheres. The country has radically transformed its economy and is now projected to be on course to become the third largest economy in the world by 2030. Besides this spectacular economic growth, Indian democracy has steadily consolidated and expanded its scope in the post-independence era. The recent successes of civil society groups in mobilising public support for various causes are testimony to the power and resilience of democratic India's ability to negotiate conflicts within the society through peaceful methods. However, despite its numerous successes, India faces enormous challenges at the domestic, regional and global levels.

India's economic growth has not been matched by the evolution of its governance structures and institutional competence resulting in higher expectations of political institutions to bridge the gap between promise and performance. India's growth story has not yet translated into the economic democracy envisioned by the country's leaders. This may cause greater social and political stresses than those that India has had to contend with during the first six decades after its independence.
