Read the following passage and answer the questions that follow :

Today perhaps your only association with the word 'polio' is the Sabin Oral Vaccine that protects children from disease. Some decades ago, this was not so. The dreaded disease, which mainly affects the brain and the spinal cord, causes stiffening and weakening of the muscles, crippling and paralysis which is why I am in a wheelchair today. If somebody had predicted, when I was born, that this would happen to me, no one would have believed it. I was the seventh child in a family of four pairs of brothers and sisters, with a huge 23 year gap between the first and the last. I was told that unlike the others, I was so fair and brown-haired that I looked like a foreigner than an Indian. I was also considered to be the healthiest of the brood.
