AI-powered systems help doctors diagnose diseases, assist students in learning, and improve productivity in workplaces. It can also analyse large amounts of	

data and provide useful information for better decision-making. AI-based devices such as virtual assistants and navigation systems make daily life easier and more convenient.

In conclusion, AI is a powerful technology that offers many benefits, including efficiency, accuracy, and convenience. However, it also presents challenges such as job loss and privacy issues. Therefore, AI should be used wisely and responsibly to ensure that it benefits society while reducing its negative effects. **4**

b) Computer and its uses

A computer is an electronic machine that takes data, processes it, and gives useful results. It helps students learn faster, complete school projects, and explore new topics online through educational games, e-books, and virtual classes.

Students research homework, watch online lessons, and read electronic books.Offices track sales, manage money, and store important files.People send emails, make video calls, and chat across the world instantly.

Doctors look up medical records, track patient health, and control medical machines. Anyone can stream movies, listen to music, and play video games.Customers check account balances, transfer money, and pay bills online.People buy clothes, groceries, and electronics from home.

Artists and engineers create digital drawings, 3D models, and animations. Researchers predict the weather, study space, and run complex math calculations. Airlines and train stations use them to book tickets and track travel schedules.

Computers are among the greatest inventions of modern times. They make work faster and connect people worldwide. When used wisely and responsibly, they are highly valuable tools for progress.

c) Water pollution

Water is free gift of nature. It's essential to all living beings.it covers around 70% of the earth. Now a day's water is being polluted. Man is the main reason for it.

Causes

- Man is polluting the water by his several actions in order to increase his comfort.
- Urbanization and industrialization are the chief factures for pollution.
- Use of chemicals and fertilizers to grow crops, wastages of agriculture are also cause for pollution.

• Letting out domestic wastages, drainages into the rivers and tanks • Industries and factories letting out waste chemical mixed water in to rivers. • Soil erosion and deforestation are also cause for pollution. • Mining's, oil leakages in the sea cause pollution Effects • Use of polluted water may cause serious diseases and even death. • It effects mainly on our health. • It may cause cholera, jaundice, typhoid, and other serious diseases. • It also effects on birds, animals, sea animals. Remedies • We should purify polluted water before letting into rivers • We should create awareness among people about importance of water. • Government should take strict rules and make effective implementation. We know that we are the main cause of pollution. It is important to control the water pollution. Without water we can't survive. So it's our responsibility to keep air clean and make our earth healthy for living.	
X. LETTER WRITING	**1X5=5**
