iii. All parts of a question must be written together.
iv. Answers of the questions must be in the context of the instructions given therein.

I. Read the passage given below and answer any five questions: - 2 x 5= 10

Reading

The horse is a domesticated one –toed, hoofed mammal. The natural life span of a domesticated horse is about 25 - 30 years, 10 years down from what it was in the wild . One can tell a horse's age from the number of teeth it has. They get all their teeth by the age of 5, after which those teeth just get longer. Horses can't breathe through their mouth. They have 10 different muscles in their ears. Horses have a nearly 360 degree all round vision. The only place they cannot see is directly behind or right in front of them. Therefore, it is unsafe to stand behind a horse. Each of the horse's two eyes work independently. A horse can sleep standing up as as he is able to lock his leg muscles which prevents him from falling. As horses become more domesticated humans have developed more uses for them, such as serving as means of transportation, source of entertainment etc. Today horses can be found in the care of humans all over the world.
