(iii)	Context: Global Logistics Corp (GLC) is a multinational shipping company. Recently, their IT department noticed a sudden slowdown in their tracking servers. Hours later, employees received an email claiming to be from the internal "IT Support" asking them to verify their login credentials on a linked webpage to "fix the server speed." Simultaneously, a critical database containing customer payment details was breached through an unpatched vulnerability in their web application, and the attackers are now demanding a financial payment to prevent releasing the data publicly. Task: Analyze the security incident at Global Logistics Corp by answering the following: 1. Threat Identification: Identify and explain the three distinct types of cyber threats active in this scenario based on the tactics used by the attackers. 2. Defence Framework: For each identified threat, determine the specific type of cyber security (e.g., network, application, operational, etc.) that GLC must implement or strengthen to mitigate these risks in the future. Justify your choices.	5
