Section A: (READING SKILL)**Read the UNSEEN PASSAGE and Answer the following questions.**

Physical fitness plays a vital role in the life of every student. It keeps the body healthy, improves mental well-being, and increases the ability to perform daily activities effectively. In today's world, many students spend a large amount of time using mobile phones, computers, and television. As a result, they often have less time for outdoor games and physical exercise. This has led to a discussion about whether modern lifestyles are affecting students' health. Many people believe that regular physical activity is essential for students. It strengthens muscles and bones, improves blood circulation, and helps maintain a healthy body weight. Exercise also reduces stress, improves concentration, and enhances memory. Students who participate in sports and physical activities often develop qualities such as teamwork, discipline, confidence, and leadership. These qualities help them not only in school but also in their future careers. However, some people argue that students should spend more time on studies rather than sports. They believe that academic success is more important than physical activities. According to them, competitive examinations require long hours of study, leaving little time for games. Some parents also worry that excessive participation in sports may affect academic performance. On the other hand, many education experts disagree with this opinion. They believe that physical fitness and academic achievement go hand in hand. A healthy body supports a healthy mind. Students who exercise regularly often feel more energetic and remain focused during classroom learning. Even a short period of daily exercise can improve mood and reduce anxiety. Therefore, schools should provide enough opportunities for sports, yoga, and recreational activities.

Parents and teachers have an important role in developing healthy habits among children. They should encourage students to participate in outdoor games instead of spending too much time on electronic devices. Simple activities such as walking, cycling, skipping, or playing badminton can greatly improve fitness. A balanced routine that includes study, exercise, rest, and healthy eating is essential for overall development. In conclusion, physical fitness is not a luxury but a necessity for every student. While academic excellence is important, good health is equally valuable. Students should understand that success depends on both a sharp mind and a healthy body. By adopting healthy habits and maintaining regular physical activity, they can lead happier, healthier, and more successful lives.
