Read the following passage and answer the questions 116-120.

The human species, according to the best theory I can form of, is composed of two distinct races, the men who borrow, and the men Who lend. To these two original diversities may be reduced to all those impertinent classifications of Gothic and Celtic tribes, white men, black men, red men. All the dwellers upon earth, "Parthians, and Medes, and Elamites," flock hither, and do naturally fall in with one or other of these primary distinctions. The infinite superiority of a farmer, which I choose to designate as a great race, Is discernible in their figure, port and a certain instinctive sovereignty. The latter are born degraded "He shall serve his brethren."There is something in the air of one of this caste, lean and suspicious; contrasting with the open, trusting, generous manners of the other.

Q116. According to the author, the best theory of human species is classified into …. classes.
