4. **Read the passage carefully and answer the questions that follow :**

The Ganga is a holy river. It is the largest river in India. It is 2510 kilometres long. It carries the water of the Himalayan snow and rains down the mountain slopes to the plain and then to the sea. In Bengal, more than 30 crores of people live on its plains. They use the river water to

drink, wash clothes, bathe, to grow crops and to dispose of the half burnt dead bodies. Its water used to be clean and pure and millions of sea creatures lived in it.

But times have changed ! Until recently the river could clean itself because the amount of water the river carried was much greater than the waste it had to carry. But today sewage and waste from industries are choking our rivers. They have become sources of diseases and death. People dump waste and garbage into the rivers. Pilgrims add to this problem. Varanasi alone gets over 70,000 pilgrims a day ! Chemical waste from factories make the river water dangerous.

The Government of India and the State Governments have taken up the task of cleaning the Ganga. It is called the "Ganga cleaning project". The main features of the project are,

— Sewage water is not let into the river.

— To prevent pollutants going into the river.

— Trees are planted along the river.

— Sulabh Sauchalayas are built along the ghats.
