PREVIEW QUESTION BANK

Module Name : WATER SCIENCE and TECHNOLOGY-ENG
Exam Date : 09-Jul-2023 Batch : 10:00-12:00

Sr. No.	Client Question ID	Question Body and Alternatives	Marks	Negative Marks
Objective Question				
1	2101	The percentage share of agriculture to total national export during 2020-21 was about : 1. 20% 2. 14% 3. 10% 4. 5% A1 : 1 A2 : 2 A3 : 3 A4 : 4	4.0	1.00
Objective Question				
2	2102	Which of the following agricultural commodity earn the highest foreign exchange through export during 2020-21 ? 1. Flower 2. Maize 3. Processed vegetables 4. Rice A1 : 1 A2 : 2 A3 : 3 A4 : 4	4.0	1.00
Objective Question				
3	2103		4.0	1.00

Which of the following statements are true about the Indian Agriculture ?

(A) India is not sufficient in edible vegetable oil production.

(B) Horticulture production was about 331 million tonnes during 2020-21

(C) PM-KISAN scheme provide Rs. 2,000 / year / farmer

(D) Per drop more crop scheme was launched in 2019-20

(E) Soil Health Card Scheme was launched in 2014-15

Choose the ***correct*** answer from the options given below :

1. (A), (C) and (D) only
2. (B), (C) and (E) only
3. (A), (B) and (E) only
4. (C), (D) and (E) only

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question				
4	2104		4.0	1.00

Match **List-I** with **List-II : -**

List-I	**List-II**
(Concept)	**(Explaination)**
(A) Ley farming	(I) Extra crop between two main crops
(B) Relay cropping	(II) Cropping between two rows of trees/shrubs.
(C) Catch cropping	(III) Sowing of next crop before harvesting of previous crop.
(D) Alley cropping	(IV) Inclusion of fodder in cropping systems.

Choose the ***correct*** answer from the options given below :

1. (A)-(IV), (B)-(III), (C)-(I), (D)-(II)
2. (A)-(II), (B)-(III), (C)-(I), (D)-(IV)
3. (A)-(IV), (B)-(II), (C)-(III), (D)-(I)
4. (A)-(I), (B)-(III), (C)-(II), (D)-(IV)

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

5 2105

Arrange these growth stages of rice in sequence from sowing to harvesting : -

(A) Dough stage

(B) Flowering stage

(C) Tillering stage

(D) Booting stage

Choose the ***correct*** answer from the options given below :

1. (A), (B), (C), (D).
2. (D), (C), (A), (B).
3. (B), (A), (D), (C).
4. (C), (D), (B), (A).

4.0 1.00

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

6 | 2106 | 4.0 | 1.00

Given below are two statements about groundnut :

Statement (I) : Groundnut cultivation is done during kharif, winter, spring and summer seasons in different parts of India.

Statement (II) : Goundnut is a non-legume crop and belongs to family compositae.

In light of the above statements, choose the ***most appropriate*** answer from the options given below.

1. Both **Statement (I)** and **Statement (II)** are true.
2. Both **Statement (I)** and **Statement (II)** are false.
3. **Statement (I)** is true but **Statement (II)** is false.
4. **Statement (I)** is false but **Statement (II)** is true.

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

7 | 2107 | 4.0 | 1.00

Which of the following statements are true about mango ?

(A) Mango belongs to family Anacardiaceae and have 2N=40.

(B) Mango is a self-pollinated fruit.

(C) Mango is rich source of Vitamin A.

(D) In monoembryonic mango propagation is done through seed.

(E) Alphonso is a cultivar of mango.

Choose the ***correct*** answer from the options given below :

1. (A), (C) and (E) only.
2. (A), (B) and (D) only.
3. (A), (B), and (E) only
4. (B), (C) and (D) only.

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

8 2108 4.0 1.00

Match **List I** with **List II**

List-I (Crops)	**List-II** (Botanical name)
(A) Groundnut	(I) *Oryza sativa*
(B) Pigeonpea	(II) *Cicer arietinum*
(C) Rice	(III) *Arachis hypogaea*
(D) Chickpea	(IV) *Cajanus cajan*

Choose the ***correct*** answer from the options given below :

1. (A) - (II), (B) - (I), (C) - (III), (D) - (IV)
2. (A) - (III), (B) - (IV), (C) - (I), (D) - (II)
3. (A) - (I), (B) - (II), (C) - (IV), (D) - (III)
4. (A) - (II), (B) - (IV), (C) - (I), (D) - (III)

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

9 | 2109 | 4.0 | 1.00

Which of the following is a dominant soil group in India ?

1. Red soils
2. Black cotton soils
3. Alluvial soils
4. Laterite soils

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

10 | 2110 | 4.0 | 1.00

Match **List-I** with **List-II**

List-I (Essential element)	**List-II** (Deficiency symptoms)
(A) Nitrogen	(I) Leaf scorching/tip burning
(B) Phosphorus	(II) Failure of terminal bud formation
(C) Potassium	(III) Pale yellow to brown necrosis
(D) Calcium	(IV) Brozing of leaf margin

Choose the ***correct*** answer from the options given below :

1. (A) - (IV), (B) - (II), (C) - (III), (D) - (I)
2. (A) - (II), (B) - (I), (C) - (III), (D) - (IV)
3. (A) - (I), (B) - (II), (C) - (IV), (D) - (III)
4. (A) - (III), (B) - (IV), (C) - (I), (D) - (II)

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

11	2111	Which of the folloing statements are true about nitrogen nutrition in plant ? (A) Nitrogen deficiency symptoms first appears on old leaf. (B) Excess nitrogen causes early maturity of crop. (C) Nitrogen translocated from old leaves to new leaves in response to demand. (D) Nearly 10% of Indian soils are deficient in nitrogen. (E) Nitrogen is constituent of chlorophyll, amino acids and nucleic acids. Choose the ***correct*** answer from the options given below : 1. (A), (B) and (E) only. 2. (A), (B) and (D) only. 3. (A), (C) and (E) only. 4. (B), (C) and (D) only. A1 : 1 A2 : 2 A3 : 3 A4 : 4	4.0	1.00

Objective Question

12	2112	Which of the following is not true about potassium nutrition in plants ? 1. Potassium plays an important role in formation of starch and translocation of sugar. 2. Potassium activates number of enzmes in plant. 3. Potassium is involved in opening and closing of stomata in plant. 4. Potassium is the main constituents of protein and chlorophyll in plant. A1 : 1 A2 : 2	4.0	1.00

A3 : 3

A4 : 4

Objective Question

13 2113

Match **List-I** with **List-II**

List-I (Cell organelles)		**List-II** (Functions)	
(A)	Ribosomes	(I)	Contains waste materials and water
(B)	Golgi bodies	(II)	Contains carotenoid pigment
(C)	Chromoplasts	(III)	Protein synthesis
(D)	Vacuole	(IV)	Formation of cell wall

Choose the ***correct*** answer from the options given below :

1. (A) - (III), (B) - (IV), (C) - (II), (D) - (I)
2. (A) - (II), (B) - (I), (C) - (III), (D) - (IV)
3. (A) - (II), (B) - (I), (C) - (IV), (D) - (III)
4. (A) - (III), (B) - (IV), (C) - (I), (D) - (II)

4.0 1.00

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

14 2114

4.0 1.00

Given below are two statements about the nucleus of cell :

Statement (I) : Chromatin netwok mainly consists of ribose nucleic acid.

Statement (II) : Nucleoli in nucleus are rich in RNA.

In light of the above statements, choose the ***most appropriate*** answer from the options given below.

1. Both **Statement (I)** and **Statement (II)** are correct.
2. Both **Statement (I)** and **Statement (II)** are incorrect.
3. **Statement (I)** is correct but **Statement (II)** is incorrect.
4. **Statement (I)** is incorrect but **Statement (II)** is correct.

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

15	2115	Among the different phases of meosis cell division, chromosomes pairing occurs in _____.	4.0	1.00

1. Pachytene
2. Zygotene
3. Anaphase II
4. Interphase II

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

16	2116		4.0	1.00

Match **List-I** with **List-II**

List-I	**List-II**
(Term)	**(Explaination)**
(A) Dihybrid	(I) Gene which supress the effect of other gene.
(B) Alleles	(II) Qualitative character gene linked with quantitative character gene
(C) Marker gene	(III) Alternative form of gene
(D) Epistatic gene	(IV) Law of independent assortment

Choose the ***correct*** answer from the options given below :

1. (A) - (I), (B) - (III), (C) - (II), (D) - (IV)
2. (A) - (II), (B) - (I), (C) - (III), (D) - (IV)
3. (A) - (IV), (B) - (III), (C) - (II), (D) - (I)
4. (A) - (III), (B) - (IV), (C) - (I), (D) - (II)

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

17	2117		4.0	1.00

Which of the following statements are true about C3 type plants ?

(A) Have two CO_2 accepter

(B) First stable product is phosphoglyceric acid

(C) Optimum temperature for photosynthesis is low as compared to C4

(D) Photosynthesis occurs even when stomata are closed.

(E) Photorespiration rate is very high

Choose the ***correct*** answer from the options given below :

1. (B), (C) and (E) only.
2. (A), (B) and (D) only.
3. (A), (B) and (E) only.
4. (B), (C) and (D) only.

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

18	2118		4.0	1.00

Given below are two statements, one is labelled as **Assertion (A)** and other one labelled as **Reason (R)**.

Assertion (A) : Light normally increases the transpiration rate in plant.

Reason (R) : Light normally causes opening of stomata and increase in temperature

In light of the above statements, choose the ***most appropriate*** answer from the options given below.

1. Both **(A)** and **(R)** are correct and **(R)** is the correct explanation of **(A)**.
2. Both **(A)** and **(R)** are correct but **(R)** is **NOT** the correct explanation of **(A)**.
3. **(A)** is correct but **(R)** is not correct.
4. **(A)** is not correct but **(R)** is correct.

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

19	2119	Which of the following is released during conversion of succinate to fumarate in TCA cycle ? 1. CO_2 2. ATP 3. H_2O 4. $FADH_2$ A1 : 1 A2 : 2 A3 : 3 A4 : 4	4.0	1.00

Objective Question

20	2120	Which of the followings is true about the DNA ? (A) DNA contains five carbon sugar. (B) In DNA Thymine is present in place Uracil. (C) DNA is central to protein syntheses. (D) In DNA one of the nucleoside is Uridine. (E) DNA is usually a double stranded structure. Choose the ***correct*** answer from the options given below : 1. (A), (B) and (D) only. 2. (A), (C) and (D) only. 3. (A), (B) and (E) only. 4. (B), (C) and (D) only. A1 : 1 A2 : 2 A3 : 3	4.0	1.00

A4 : 4

Objective Question

21 | 2121 | 4.0 | 1.00

Given below are two statements :

Statement (I) : Karnal bunt is the fungal disease of wheat first reported from Karnal, Haryana.

Statement (II) : Karnal bunt can be controlled by adoption of resistant/tolerant varieties and seed treatment with vitavax.

In light of the above statements, choose the ***most appropriate*** answer from the options given below.

1. Both **Statement (I)** and **Statement (II)** are true.
2. Both **Statement (I)** and **Statement (II)** are false.
3. **Statement (I)** is true but **Statement (II)** is false.
4. **Statement (I)** is false but **Statement (II)** is true.

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

22 | 2122 | 4.0 | 1.00

Match **List-I** with **List-II**

List-I (Crops)	**List-II** (Insect-pest/disease)
(A) Sugarcane	(I) American bollworm
(B) Chickpea	(II) Neck blast
(C) Cotton	(III) Red rot
(D) Rice	(IV) Pod borer

Choose the ***correct*** answer from the options given below :

1. (A) - (I), (B) - (III), (C) - (II), (D) - (IV)
2. (A) - (III), (B) - (IV), (C) - (I), (D) - (II)
3. (A) - (I), (B) - (II), (C) - (IV), (D) - (III)
4. (A) - (III), (B) - (IV), (C) - (II), (D) - (I)

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

23 2123

Match **List-I** with **List-II**

List-I (Govt. Programme)	**List-II** (Purpose of programme)
(A) PM KISAN Scheme	(I) For efficient use of irrigation water
(B) NMEO	(II) For efficient use of fertilizers and soil health improvement
(C) PDMC	(III) For increasing vegetable oil production
(D) SHC	(IV) For providing financial help to farmers

Choose the ***correct*** answer from the options given below :

1. (A) - (II), (B) - (I), (C) - (III), (D) - (IV)
2. (A) - (IV), (B) - (II), (C) - (III), (D) - (I)
3. (A) - (IV), (B) - (III), (C) - (I), (D) - (II)
4. (A) - (III), (B) - (IV), (C) - (I), (D) - (II)

4.0 1.00

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

24 2124

4.0 1.00

Arrange these ICAR Institutes in order of their location from South to North in India.

(A) Central Agro-forestry Research Institute

(B) National Bureau of Plant Genetics Resources

(C) Indian Institute of Maize research

(D) Central Tuber Crops Research Institute

Choose the ***correct*** answer from the options given below :

1. (A), (D), (C), (B).
2. (D), (C), (A), (B).
3. (B), (A), (D), (C).
4. (D), (A), (B), (C).

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

25	2125	Which of the following ICAR-Institutes have their correct location ? (A) Indian Institute of Agricultural Biotechnology, Ranchi, Jharkhand (B) Central Institute of Fisheries Education, Cochin, Kerala (C) Central Institute for Research on Goats, Bikaner, Rajasthan (D) Central Soil Salinity Research Institute, Karnal, Haryana (E) Central Tobacco Research Institute, Rajamundhary, Andhra Pradesh Choose the ***correct*** answer from the options given below : 1. (A), (B) and (D) only. 2. (A), (D) and (E) only. 3. (B), (C) and (D) only. 4. (B), (C) and (E) only. A1 : 1	4.0	1.00

		A2 : 2 A3 : 3 A4 : 4		
Objective Question				
26	2126	The concept of "time of concentration" refers to _____. 1. The time, it takes for rainfall to reach ground surface 2. The time, it takes for clouds to form and rain start falling 3. The time, it takes for runoff to reach a specific point in the watershed 4. The time, it takes for evaporation to occur after rainfall A1 : 1 A2 : 2 A3 : 3 A4 : 4	4.0	1.00
Objective Question				
27	2127	Arrange Land capability classes from "Fit for cultivation" to "not suitable for cultivation" (A) Light green (B) Dark green (C) Yellow (D) Blue (E) Red Choose the ***correct*** answer from the options given below : 1. (A), (B), (C), (D), (E). 2. (A), (C), (E), (D), (B). 3. (B), (A), (D), (C), (E). 4. (B), (A), (C), (E), (D). A1 : 1 A2 : 2	4.0	1.00

		A3 : 3 A4 : 4		
Objective Question				
28	2128	Which of the following relations exists in terms of their better performance if rainfall data points are small in number (<25) in frequency analysis of rainfall ? 1. California>Weibull>Foster 2. California>Foster>Weibull 3. Foster>California>Weibull 4. Weibull>Foster>California A1 : 1 A2 : 2 A3 : 3 A4 : 4	4.0	1.00
Objective Question				
29	2129	Difference between observed total rainfall hyetograph and the excess rainfall hyetograph is termed as _____. 1. Base flow 2. Subtraction 3. Abstraction 4. Overland flow A1 : 1 A2 : 2 A3 : 3 A4 : 4	4.0	1.00
Objective Question				
30	2130		4.0	1.00

		Determine the recurrence interval in years using Weibull formula if data is available for 16 years and 10 is the ranking of the particular event. 1. 1.5 years 2. 1.7 years 3. 0.59 years 4. 0.63 years A1 : 1 A2 : 2 A3 : 3 A4 : 4		
Objective Question				
31	2131	Which of the following statements is/are ***correct*** ? (A) Anticyclones are regions of high pressure and cause clockwise wind circulation in northern hemisphere. (B) Anticyclons are regions of low pressure but cause clockwise wind circulation in northern hemisphere. (C) Cyclons are regions of low pressure with circular wind motion. 1. (A) and (B) only. 2. (A), (B) and (C) only. 3. (B) and (C) only. 4. (A) and (C) only. A1 : 1 A2 : 2 A3 : 3 A4 : 4	4.0	1.00
Objective Question				
32	2132		4.0	1.00

Match **List-I** with **List-II**

List-I (Rainfall interpretation)	List-II (Represented By)
(A) Mass curve	(I) Rainfall intensity vs time
(B) Unit hydrograph	(II) Cumulative precipitation vs time
(C) Depth area duration curve	(III) Discharge rate vs Time
(D) Hyetograph	(IV) Average depth of rainfall vs area

Choose the ***correct*** answer from the options given below :

1. (A) - (III), (B) - (IV), (C) - (I), (D) - (II)
2. (A) - (IV), (B) - (III), (C) - (II), (D) - (I)
3. (A) - (II), (B) - (III), (C) - (IV), (D) - (I)
4. (A) - (II), (B) - (IV), (C) - (III), (D) - (I)

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

33	2133	The average annual rainfall of India is _____. 1. 119.4 mm 2. 119.4 cm 3. 11.94 m 4. 219 cm A1 : 1 A2 : 2 A3 : 3 A4 : 4	4.0	1.00

Objective Question

34	2134		4.0	1.00

Given below are two statements, one is labelled as **Assertion (A)** and other one labelled as **Reason (R)**.

Assertion (A) : AMC-I represents the low runoff potential.

Reason (R) : The watershed soils are dry enough for satisfactory cultivation.

In light of the above statements, choose the *correct* answer from the options given below.

1. Both **(A)** and **(R)** are true but **(R)** is NOT the correct explanation of **(A)**.
2. Both **(A)** and **(R)** are true and **(R)** is the correct explanation of **(A)**.
3. **(A)** is true but **(R)** is false.
4. **(A)** is false but **(R)** is true.

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

35	2135	Normal ratio method is used _____. 1. To separate baseflow from hydrograph 2. To find mean precipitation over an area 3. To check consistency of raingauge station 4. To estimate missing rainfall data A1 : 1 A2 : 2 A3 : 3 A4 : 4	4.0	1.00

Objective Question

36	2136		4.0	1.00

		Recession limb of hydrograph is controlled by _____. 1. Basin characteristics only 2. Storm characteristics only 3. Basin and storm characteristics 4. Initial and infiltration losses A1 : 1 A2 : 2 A3 : 3 A4 : 4		
Objective Question				
37	2137	Given below are two statements : **Statement (I) :** Fan shaped catchment give high peak and narrow hydrograph. **Statement (II) :** Elongated catchment give broad and low peaked hydrograph. In light of the above statements, choose the ***most appropriate*** answer from the options given below. 1. Both **Statement (I)** and **Statement (II)** are true. 2. Both **Statement (I)** and **Statement (II)** are false. 3. **Statement (I)** is true but **Statement (II)** is false. 4. **Statement (I)** is false but **Statement (II)** is true. A1 : 1 A2 : 2 A3 : 3 A4 : 4	4.0	1.00
Objective Question				
38	2138		4.0	1.00

Precipitation is measured using _____.

(A) Raingauge

(B) Pluviometer

(C) Ombrometer

(D) Hyetometer

Choose the ***correct*** answer from the options given below :

1. (A), (B) and (D) only.
2. (A) and (B) only.
3. (A), (B), (C) and (D).
4. (A) only.

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

39	2139	The diameter of circular collecting area of Symon's gauge is _____. 1. 30.5 cm 2. 12.7 cm 3. 5 cm 4. 7.7 cm A1 : 1 A2 : 2 A3 : 3 A4 : 4	4.0	1.00

Objective Question

40	2140		4.0	1.00

		_____ is known as land of Thousand Lakes. 1. Andhra Pradesh 2. Telangana 3. Karnataka 4. Tamilnadu A1 : 1 A2 : 2 A3 : 3 A4 : 4		
Objective Question				
41	2141	Which of the following methods does not directly account for orographic influences on rainfall ? 1. Arithmatic mean method 2. Reciprocal distance squared method 3. Thiessen method 4. Isohyetal method A1 : 1 A2 : 2 A3 : 3 A4 : 4	4.0	1.00
Objective Question				
42	2142	National Watershed Development Programme for Rainfed Agriculture was started in _____. 1. 1977-78 2. 1945-46 3. 1970-71 4. 1986-87 A1 : 1 A2 : 2 A3 : 3	4.0	1.00

A4 : 4

Objective Question

43 | 2143 | 4.0 | 1.00

The year in which the common guideline for watershed development projects by Government of India formulated was :

1. 2002
2. 2006
3. 2008
4. 2010

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

44 | 2144 | 4.0 | 1.00

Match **List-I** with **List-II**

List-I (Watershed model)	**List-II** (State)
(A) Nada	(I) Odisha
(B) Fakot	(II) Karnataka
(C) GR Hali	(III) Uttarakhand
(D) Kokriguda	(IV) Maharashtra
(E) Kumbhare	(V) Haryana

Choose the ***correct*** answer from the options given below :

1. (A) - (III), (B) - (V), (C) - (IV), (D) - (I) , (E)-(II)
2. (A) - (V), (B) - (III), (C) - (II), (D) - (I),- (E) - (IV)
3. (A) - (IV), (B) - (V), (C) - (II)), (D) - (III), (E) - (I)
4. (A) - (II), (B) - (IV), (C) - (I), (D) - (V), (E) - (III)

A1 : 1

A2 : 2

		A3 : 3 A4 : 4		
Objective Question				
45	2145	Arrange the followings in terms of their lower to higher value of run off coefficients for silt type of soil at 10 – 30% slope. (A) Cultivated land (B) Pasture land (C) Forest land Choose the ***correct*** answer from the options given below : 1. (A), (B), (C) 2. (A), (C), (B). 3. (C), (B), (A). 4. (B), (C), (A). A1 : 1 A2 : 2 A3 : 3 A4 : 4	4.0	1.00
Objective Question				
46	2146		4.0	1.00

Criteria for selection of site for construction of embankment type of water harvesting structures are:

(A) The site should be 0.5 km away from settlement area.

(B) The permeability of the soils in storage area should be minimum in percolation tank.

(C) The command area should be as close as possible to the dam/pond site.

(D) The downstream area should permit natural passage for safe disposal of surplus water.

Choose the ***correct*** answer from the options given below :

1. (A), and (C) only.
2. (B), (C) and (D) only.
3. (A), (C) and (D) only
4. (B) and (D) only.

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question				
47	2147		4.0	1.00

Match **List-I** with **List-II**

List-I (Traditional water harvesting structure)	**List-II** (State/Region)
(A) Khadin	(I) Bihar
(B) Bandhara	(II) Bundelkhand
(C) Ahar	(III) Rajasthan
(D) Bandhis	(IV) Maharashtra
(E) Haweli	(V) Uttarpradesh

Choose the ***correct*** answer from the options given below :

1. (A) - (IV), (B) - (I), (C) - (V), (D) - (II), (E) - (III)
2. (A) - (III), (B) - (IV), (C) - (I), (D) - (V), (E) - (II)
3. (A) - (V), (B) - (II), (C) - (I), (D) - (III), (E) - (IV)
4. (A) - (III), (B) - (I), (C) - (V), (D) - (IV), (E) - (II)

A3 : 3

A4 : 4

Objective Question

48 2148

Given below are two statements, one is labelled as **Assertion (A)** and other one labelled as **Reason (R)**.

Assertion (A) : High concentration of sodium in irrigation water is not desirable.

Reason (R) : It causes deflocculation of soil aggregates and seals the pores.

In light of the above statements, choose the ***correct*** answer from the options given below.

1. Both **(A)** and **(R)** are true and **(R)** is the correct explanation of **(A)**.
2. Both **(A)** and **(R)** are true and **(R)** is the not correct explanation of **(A)**.
3. **(A)** is true but **(R)** is false.
4. **(A)** is false but **(R)** is true.

(B) Chezy	(II) Friction factor
(C) Darcy-Weisbach	(III) Design of open channels
(D) Manning's	(IV) Estimates on seepage loss in canal systems

Choose the ***correct*** answer from the options given below :

1. (A) - (II), (B) - (III), (C) - (IV), (D) - (I)
2. (A) - (I), (B) - (II), (C) - (III), (D) - (IV)
3. (A) - (I), (B) - (IV), (C) - (II), (D) - (III)
4. (A) - (IV), (B) - (I), (C) - (II), (D) - (III)

A2 : 2

A3 : 3

A4 : 4

Objective Question

97	2197	One dimentional flow is : 1. Steady uniform flow 2. Uniform flow 3. Flow which neglects changes in a transverse direction 4. Restricted to flow in a straight line A1 : 1 A2 : 2 A3 : 3 A4 : 4	4.0	1.00
Objective Question				
98	2198	Given below are two statements : **Statement (I) :** The commercial unit of energy is 1 kWh. **Statement (II) :** $1kWh = 2.6 \times 10^6 J$ In light of the above statements, choose the ***most appropriate*** answer from the options given below. 1. Both **Statement (I)** and **Statement (II)** are true. 2. Both **Statement (I)** and **Statement (II)** are false. 3. **Statement (I)** is true but **Statement (II)** is false. 4. **Statement (I)** is false but **Statement (II)** is true. A1 : 1 A2 : 2 A3 : 3 A4 : 4	4.0	1.00
Objective Question				
99	2199		4.0	1.00

Given below are two statements, one is labelled as **Assertion (A)** and other one labelled as **Reason (R)**.

Assertion (A) : A good measure of dispersion needs to be least affected by change in the sampling.

Reason (R) : Standard deviation is the best measure of dispersion.

In light of the above statements, choose the ***most appropriate*** answer from the options given below.

1. Both **(A)** and **(R)** are correct and **(R)** is the correct explanation of **(A)**.
2. Both **(A)** and **(R)** are correct but **(R)** is NOT the correct explanation of **(A)**.
3. **(A)** is correct but **(R)** is not correct.
4. **(A)** is not correct but **(R)** is correct.

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

100	2200	The average variable cost is the result of _____. 1. Total variable cost and fixed cost. 2. Output and marginal cost. 3. Marginal cost and total variable cost. 4. Total variable cost and output. A1 : 1 A2 : 2 A3 : 3 A4 : 4	4.0	1.00

Objective Question

101	2201		4.0	1.00

		Distance of throw of water through a sprinkler nozzle is not a function of : 1. The operating pressure 2. Size and shape of the nozzle 3. Distance between laterals 4. Angle of nozzle opening A1 : 1 A2 : 2 A3 : 3 A4 : 4		
Objective Question				
102	2202	Followings are the statements related to water saving in drip irrigation. Identify the statement that is NOT correct. 1. Only a part of the field is wetted during irrigation 2. Deep percolation losses are minimized 3. Surface runoff is minimized 4. Crop water requirement is reduced A1 : 1 A2 : 2 A3 : 3 A4 : 4	4.0	1.00
Objective Question				
103	2203		4.0	1.00

Given below are two statements, one is labelled as **Assertion (A)** and other one labelled as **Reason (R)**.

Assertion (A) : Surface irrigation methods are the oldest, most commonly used methods and may continue to dominate irrigation scene in India.

Reason (R) : Farmers are quite familiar with surface irrigation being traditional in nature, easy to practice even with limited resources.

In light of the above statements, choose the ***most appropriate*** answer from the options given below.

1. Both **(A)** and **(R)** are correct and **(R)** is the correct explanation of **(A)**.
2. Both **(A)** and **(R)** are incorrect and **(R)** is the not the correct explanation of **(A)**.
3. **(A)** is correct but **(R)** is not correct.
4. **(A)** is not correct but **(R)** is correct.

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

104	2204	Arrange the followings irrigation methods in ascending order (low to high) of their irrigation use efficiencies. (A) Border irrigation (B) Sprinkler irrigation (C) Drip irrigation (D) Flood irrigation Choose the ***correct*** answer from the options given below : 1. (A), (B), (C), (D). 2. (D), (A), (B), (C). 3. (B), (A), (D), (C). 4. (C), (B), (D), (A). A1 : 1 A2 : 2	4.0	1.00

		A3 : 3 A4 : 4		
Objective Question				
105	2205	A tube well is used to irrigate the field. It pumps 9000 m^3 of water out of which 8100 m^3 reaches the field head. Calculate the farm irrigation system efficiency, if the irrigation water application efficiency is 60%. 1. 90% 2. 65.5% 3. 54% 4. 75% A1 : 1 A2 : 2 A3 : 3 A4 : 4	4.0	1.00
Objective Question				
106	2206	Four distinct growth stages are used to estimate crop evapotranspiration for which crop coefficients vary from one stage to another. In general the highest crop coefficient is at the stage : 1. Initial or early stage 2. Crop development stage 3. Mid-season stage 4. Late season or harvest stage A1 : 1 A2 : 2 A3 : 3 A4 : 4	4.0	1.00
Objective Question				
107	2207		4.0	1.00

Given below are two statements, one is labelled as **Assertion (A)** and other one labelled as **Reason (R)**.

Assertion (A) : A tensiometer vacuum gauge has divisions in the range of 0 to 100 centibars although in practice the range of operation of a tensiometer is 0 to 85 centibars.

Reason (R) : At the upper limit of 85 centibars, the column of water in the tube will form water vapour bubbles and the instrument will cease to function.

In light of the above statements, choose the ***most appropriate*** answer from the options given below.

1. Both **(A)** and **(R)** are not correct and **(R)** is not the correct explanation of **(A)**.
2. Both **(A)** and **(R)** are correct and **(R)** is the correct explanation of **(A)**.
3. **(A)** is correct but **(R)** is not correct.
4. **(A)** is not correct but **(R)** is correct.

A4 : 4

Objective Question

108 2208

Given below are four soil moisture constants

(A) Field capacity moisture content

(B) Saturation moisture content

(C) Hygroscopic moisture content

(D) Permanent wilting point

Choose the ***correct*** combination from the options given below that is used to calculate the total plant available water :

1. (A), and (C) only.
2. (B) and (D) only.
3. (A), and (D) only
4. (B), (C) and (D) only.

A1 : 1

		A2 : 2 A3 : 3 A4 : 4		
Objective Question				
109	2209	In water pumping terminology, acronym NPSHA stands for : 1. Net positive suction head available 2. Net pressure system head available 3. Net positive suction head allowed 4. Net pumping system head available A1 : 1 A2 : 2 A3 : 3 A4 : 4	4.0	1.00
Objective Question				
110	2210	Which of the following statement related to pump Head versus Discharge characteristic curve is NOT true ? 1. The head produced by a pump in general steadily decreases with increasing pump discharge 2. The head generated by the pump when discharge is zero (pump is operating against a closed valve) is called shut-off head 3. Shut-off head is used to design piping on the discharge side of the pump, so that it is able to withstand the shut-off head when the discharge valve is closed 4. Pump efficiency is maximum at the shut-off head A1 : 1 A2 : 2 A3 : 3 A4 : 4	4.0	1.00
Objective Question				
111	2211		4.0	1.00

Given below are two statements :

Statement (I) : When two pumps are installed in series, discharge remaining the same, water is lifted to greater height compared to a single pump.

Statement (II) : When two pumps are installed in parallel then not only the discharge increases but water is also lifted to greater height compared to a single pump.

In light of the above statements, choose the ***most appropriate*** answer from the options given below.

1. Both **Statement (I)** and **Statement (II)** are true.
2. Both **Statement (I)** and **Statement (II)** are not true.
3. **Statement (I)** is true but **Statement (II)** is false.
4. **Statement (I)** is false but **Statement (II)** is true.

Objective Question

112	2212	A centrifugal pump runs at 1500 revolution per minute (RPM) and delivers water against a head of 10 m. What would be the head developed if the pump is operated at 1650 RPM ? 1. 11.0 m 2. 12.1 m 3. 13.31 m 4. 10 m A1 : 1 A2 : 2 A3 : 3 A4 : 4	4.0	1.00

Objective Question

113	2213		4.0	1.00

		Which method of drilling wells uses water and bentonite mixture (mud) as drilling fluid ? 1. Rotary percussion drilling 2. Air rotary drilling 3. Rotary drilling 4. Reverse-circulation rotary drilling A1 : 1 A2 : 2 A3 : 3 A4 : 4		
Objective Question				
114	2214	A total station in drainage investigations is used to 1. Measure water table depth 2. Measure artesian pressure 3. Conduct water quality surveys 4. Conduct topographic surveys A1 : 1 A2 : 2 A3 : 3 A4 : 4	4.0	1.00
Objective Question				
115	2215	In which layout subsurface drains enter the main drain at an angle ? 1. Parallel system 2. Double main system 3. Random system 4. Herringbone system A1 : 1 A2 : 2 A3 : 3	4.0	1.00

A4 : 4

Objective Question

116	2216	Hooghoudt's equation is used to design lateral drain spacing for two layered profiles, if 1. Drains are located in the upper layer only 2. Drains are located at the interface of the two layers only 3. Drains are located in the lower layer only 4. Drains are located either in the upper or lower layers only A1 : 1 A2 : 2 A3 : 3 A4 : 4	4.0	1.00

Objective Question

117	2217	Surface drainage coefficient of a watershed is 1.44 mm/day. What should be the capacity of the surface drain at the outlet of the watershed, if its area is 500 ha ? 1. 3 m^3/min 2. 10 m^3/min 3. 5 m^3/min 4. 50 m^3/min A1 : 1 A2 : 2 A3 : 3 A4 : 4	4.0	1.00

Objective Question

118	2218		4.0	1.00

Given below are two statements :

Statement (I) : Irrigation tubewells should be so located that there is no interference in the cone of depressions of the two adjoining tubewells.

Statement (II) : Drainage tubewells to lower water table should be so located that there is some interference in the cone of depressions of two adjoining tubewells.

In light of the above statements, choose the ***most appropriate*** answer from the options given below.

1. Both **Statement (I)** and **Statement (II)** are true.
2. Both **Statement (I)** and **Statement (II)** are false.
3. **Statement (I)** is true but **Statement (II)** is false.
4. **Statement (I)** is false but **Statement (II)** is true.

A1 : 1

A2 : 2

A3 : 3

A4 : 4

Objective Question

119	2219		4.0	1.00

Given below are two statements :

Statement (I) : Pricing of water on volumetric basis helps to incentivize water conservation, improve water use efficiencies and restrict overuse of water.

Statement (II) : Pricing water on volumteric water supply basis requires huge investments in irrigation water supply infrastructure including water measurement structures, development of operational plans and revenue collection procedures.

In light of the above statements, choose the ***most appropriate*** answer from the options given below.

1. Both **Statement (I)** and **Statement (II)** are false.
2. **Statement (I)** is true but **Statement (II)** is false.
3. Both **Statement (I)** and **Statement (II)** are true.
4. **Statement (I)** is false but **Statement (II)** is true.
