Read the following passage carefully and answer the questions (Q. Nos. 1 to 4) choosing the correct alternatives :

Many millions of people in city slums reside in makeshift dwellings made with wattle and clay, garbage bags and polythene sheets. However, they are not so unlucky as the large number of people who live in the streets. There are many reasons for this malaise. Impoverishment of rural peasantry forces people to move out of villages to seek their livelihood in the towns and cities. Many of them are ragpickers and some of them work as manual labourers. Some of them earn money as street vendors. Women mostly work as maids in houses. They find the slums of cities a far better place than their own villages due to extreme poverty there. Moreover, unemployment is the other prominent reason for migration to the city slums. Exploitation under the feudalistic society of the rural India is another reason why people are forced to leave their land of birth. But due to illiteracy the migrants are not able to get good jobs in the city and remain poor. Due to the lack of development of infrastructure in the villages there are no employments and it widens the gap between the rural and urban India.
