FOR HARYANA CLASS 12 PREPARATION

HBSE Class 12 Sample Paper 2027 English Special

EXAM	YEAR	TYPE	SUBJECT
Haryana Class 12	2027	Sample Paper	English

SAMPLE QUESTION PAPER (2026-27)

CLASS -XIIth

SUBJECT-ENGLISH(Special)

Time-3Hours. M.M.80

General Instructions-

1. The Question paper contains two sections- Reading skill and Writing skill.

2. Attempt questions based on specific instructions for each part.

Section-A

Reading Skill

Q.1)Read the following passage carefully and answer the questions that follow:. 10×1=10

Artificial Intelligence (AI) is rapidly transforming the modern world. From healthcare and education to transportation and entertainment, AI-powered systems are helping people perform tasks more efficiently. Machines can now analyze large amounts of data, recognize patterns, and even make decisions in situations where human intervention was once necessary. While these developments offer numerous benefits, they also raise concerns about privacy, employment, and ethical decision-making.

One of the greatest advantages of AI is its ability to process information at remarkable speed. In the medical field, AI can assist doctors in diagnosing diseases earlier and more accurately. In education, personalized learning systems help students learn according to their abilities and pace. Businesses use AI to improve customer service and increase productivity.

However, critics argue that excessive reliance on AI may lead to job displacement as machines replace workers in certain industries. There are also concerns about the misuse of personal data and the possibility of biased algorithms producing unfair outcomes. Therefore, experts emphasize the importance of developing AI responsibly and ensuring that human values remain at the center of technological progress.

Multiple Choice Questions

1. What is the main topic of the passage? a) Climate Change

b) Artificial Intelligence

c) Space Exploration

d) Global Trade

2. AI helps people perform tasks more _____. a) slowly

b) carelessly

c) efficiently

d) traditionally

3. Which field is NOT mentioned in the passage? a) Healthcare

b) Education

c) Transportation

d) Agriculture

4. AI can assist doctors by _____. a) building hospitals

b) diagnosing diseases

c) manufacturing medicines

d) training nurses

5. Personalized learning systems help students learn according to their _____. a) age only

b) interests only

c) abilities and pace

d) financial status

6. Businesses use AI to improve _____. a) weather forecasting

b) customer service

c) agriculture

d) tourism

7. What concern do critics have about AI? a) It increases employment everywhere.

b) It may lead to job displacement.

c) It reduces technology.

d) It eliminates education.

8. What may happen if algorithms are biased? a) Faster internet

b) Fair outcomes

c) Unfair outcomes

d) Better transportation

9. According to experts, AI should be developed _____. a) irresponsibly

b) rapidly

c) secretly

d) responsibly

10. The word "ethical" in the passage means _____. a) related to morals and principles

b) related to speed

c) related to machines only

d) related to money

Q.2)Read the following passage carefully and answer the questions that follow:.

10×1=10

The increasing urbanization of the world has brought both opportunities and challenges. Cities are centers of innovation, economic growth, and cultural exchange. They attract people seeking better education, healthcare, and employment opportunities. As a result, urban populations have grown rapidly over the past few decades.

However, this growth has also placed immense pressure on infrastructure and natural resources. Many cities struggle with traffic congestion, pollution, inadequate housing, and waste management problems. The expansion of urban areas often leads to the destruction of green spaces, which play a crucial role in maintaining ecological balance.

Urban planners argue that sustainable development is the key to addressing these issues. Sustainable cities focus on efficient public transportation, renewable energy, green buildings, and the preservation of natural habitats. Citizens also have an important role to play by adopting environmentally responsible lifestyles and supporting policies that promote sustainability.

The future of urban living depends on the ability of governments, businesses, and individuals to work together. By embracing innovation while protecting the environment, cities can become more resilient, inclusive, and livable for future generations.

Multiple Choice Questions

1. What is the central theme of the passage? a) Agricultural Development

b) Urbanization and Sustainable Development

c) Population Decline

d) Industrial Revolution

2. Cities attract people mainly because of better _____. a) forests and wildlife

b) climate conditions

c) education, healthcare, and jobs

d) agricultural land

3. What has happened to urban populations in recent decades? a) They have decreased.

b) They have remained stable.

c) They have grown rapidly.

d) They have disappeared.

4. Which of the following is NOT mentioned as an urban problem? a) Traffic congestion

b) Pollution

c) Inadequate housing

d) Earthquakes

5. Green spaces are important because they help maintain _____. a) tourism

b) ecological balance

c) trade relations

d) population growth

6. What do urban planners recommend as a solution? a) Industrial expansion

b) Sustainable development

c) Rural migration

d) Privatization

7. Sustainable cities promote the use of _____. a) fossil fuels only

b) traditional housing only

c) renewable energy

d) private vehicles only

8. Who has an important role in supporting sustainability? a) Citizens only

b) Governments only

c) Businesses only

d) Citizens, governments, and businesses

9. The word "resilient" in the passage most nearly means _____. a) weak

b) adaptable and strong

c) polluted

d) crowded

10. The passage suggests that the future of cities depends on _____. a) technological progress alone

b) population control only

c) cooperation among different groups

d) increasing urban expansion

Q.3 Precis the following passages in your own words-:

A.The modern obsession with constant connectivity has subtly but profoundly altered the landscape of human thought. We live in an era where silence is viewed as a vacuum to be filled, and any pause in activity is immediately met with the glowing screen of a smartphone. While this digital ubiquity offers unprecedented access to information and global networks, it simultaneously erodes our capacity for deep, sustained attention. True creativity and self-

reflection do not thrive in an environment of perpetual distraction; they require periods of cognitive stillness—boredom, even—to take root.

When every spare moment is surrendered to notifications and algorithmic feeds, the brain is conditioned to seek immediate, superficial gratification. We become highly efficient at scanning and skimming, but lose the patience required for deep reading and complex problem-solving. Furthermore, this constant external stimulation crowds out our internal monologue, making it increasingly difficult to process our own emotions or form independent viewpoints. Technology was intended to be a tool that serves human productivity, but without conscious boundaries, it risks reshaping our very psychology, trading the profound depth of human focus for a shallow, fragmented state of perpetual awareness. If we wish to preserve our capacity for original thought, we must intentionally cultivate spaces of disconnection.

a Give a suitable title to it.

b Precis it in your own words.

In the contemporary world, the traditional boundaries between professional labor and personal life have blurred to the point of invisibility. The rise of "hustle culture" has elevated industriousness from a mere means of earning a living into a defining moral virtue. Today, individuals are encouraged—and often expected—to monetize their hobbies, maintain secondary "side gigs," and view every waking hour as an opportunity for self-optimization and career advancement. This relentless pursuit of productivity is heavily romanticized on social media, where exhaustion is frequently flaunted as a badge of honor and a symbol of dedication.

By treating human beings as economic engines that must constantly maximize output, hustle culture inevitably leads to widespread burnout, anxiety, and a profound sense of alienation. True leisure, which was once understood as essential rest and contemplation, has been rebrandings as "laziness" or wasted time. When rest is only permitted if it serves the purpose of recharging for future labor, it ceases to be genuine freedom. Ultimately, redefining human worth solely through the lens of economic productivity robs life of its intrinsic value. If we are to reclaim our well-being, we must challenge the narrative that our utility determines our dignity.

Q. a Give a suitable title to it.

b. Precis it in your words.

Section-B

Writing Skill

Q.4 Attempt any two-:

A .You are Rohan/Ritika, a student of Class XII. Write an application to the Principal requesting three days' leave due to illness.

B. Write a letter to the Editor of a local newspaper expressing concern about the increasing use of plastic and suggesting measures to reduce plastic pollution.

C. You have seen an advertisement for the post of Computer Operator in a reputed company. Write an application for the post along with your bio-data.

Q.5 Write a paragraph on any two topics-:

A. My Aim in Life

B. Benefits of Sports

C. Hazards of Pollution
