LOGIC AND PHILOSOPHY

SYLLABUS FOR HIGHER SECONDARY COURSE

Objective:

Philosophy enquires into the meaning and significance of life and the world. It is called a second order discipline in so far as it enquires into the foundations and presuppositions of various disciplines. Logic is a science which deals with forms of arguments. In an extended sense, it studies the methodology of deductive as well as inductive science. Modern logic is a fastly developing science and it is closely related to mathematics. It does not cancel the Aristotelian logic but points out its limitations. So in the syllabus, we intend to acquaint the students with the elements of traditional logic, modern logic and scientific method. The syllabus will also acquaint students with a few essential problems of Western and Indian Philosophy.
