FOREWORD

The National Education Policy (NEP) 2020 has ushered in a transformative shift in the way we perceive teaching, learning, and assessment in our schools. At the heart of this change lies a focus on competency-based education — an approach that emphasizes the application of knowledge, critical thinking, and the development of real-life skills among students.

The National Curriculum Framework for School Education (NCFSE) 2023 emphasizes competency-based learning and assessment, shifting the focus from rote memorization to the practical application of knowledge and skills. Competency-based assessment (CBA) evaluates a student's ability to use their knowledge and skills in real-world contexts, rather than just their recall of facts. This approach aligns with the goals of the National Education Policy (NEP) 2020, which aims to foster critical thinking, problem solving, and other 21st century skills.

The Directorate of Educational Research and Training (DERT), Meghalaya, is committed to enhancing the quality of School education in the State through academic support, curriculum development, and capacity building. As part of this ongoing endeavour, the present set of sample question papers has been developed in aligning classroom instruction with assessment patterns.

In line with this progressive vision, the **Sample Question Papers for Classes 6 to 8 across subjects- Science, Mathematics, Social Science and Languages which include English, Khasi, Garo and Hindi which are oriented towards Competency-Based Assessment** and have been developed as a resource to support teachers, and students in navigating this important transition. These sample question papers are designed not merely to test rote memorization, but to assess the depth of understanding, analytical skills, and the ability of learners to apply concepts in novel situations.

The sample question papers included in this document aim to promote active engagement with the curriculum, nurture curiosity, and encourage problem-solving. Teachers can use these as models to create meaningful classroom assessments, while students can gain a clearer understanding of what is expected in a competency-driven learning environment.

We hope that this collection will serve as a valuable tool in enhancing the quality of assessment practices in schools, and in turn, contribute to building a more holistic and learner-cantered education system.

I would like to extend my sincere appreciation to all the contributors involved in this academic endeavour. Constructive feedback from users of this resource is welcomed and will be valuable in guiding future improvements.

Let us continue working together to foster a culture of thoughtful learning and fair assessment, paving the way for a generation that is confident, capable, and future-ready.

Director,
Directorate of Educational Research & Training,

Background Note

NEP 2020 envisions a transformation in school assessment, away from rote memorization towards formative, regular, competency-based evaluation that tests higher-order thinking like analysis, critical thinking, and conceptual understanding

NCFSE 2023 builds on that vision and emphasizes “assessment as learning”, “for learning”, and “of learning” which are oriented towards competencies and capacities development in the learners.

Competency-Based Assessments under NEP 2020 and NCFSE 2023 are a reformative thrust toward holistic, skills-based, student-cantered learning. Through ongoing formative checks, diverse assessment modes, rubrics, self-reflection, and board-level flexibility, the new paradigm seeks to nurture critical thinkers rather than rote learners.

Competency-based questions (CBQs) and competency-based assessments (CBAs) play a crucial role in learning, and performance evaluation. They shift the focus from rote memorization or general qualifications to real-world skills, behaviours, and outcomes.

The Sample Question Papers prepared and developed by the Directorate of Educational Research and Training are based on the revised syllabus 2026 of Meghalaya School Education for classes 6 to 8 across core subjects such as Science, Mathematics, Social Science and Language including English, Khasi, Garo and Hindi.

These sample question papers across these grades and subjects shift focus from rote memorization to the application of knowledge, critical thinking, and real-world problem-solving skills and allow students to realise that what they learn in school is to help them relate with realities of life and to prepare them for the future as responsible and contributing citizens.

The key benefits of these sample questions across the subjects Science, Mathematics, Social Science and Language including English, Khasi, Garo and Hindi and across grades 6 to 9, is that they serve both as practice tools and as assessment frameworks, helping teachers design questions that test learners beyond their conceptual understanding and to help in assessing their higher-order reasoning and application capacities and skills.

Furthermore, these sample questions can serve as tools for teachers for test planning, question framing, and assessing higher-order skills. Besides this is will also help prepares teachers and students for practice aligned with demands of real competency-based items in future board exams offering exposure to varied question formats.

Furthermore, these sample questions will help to equip students with the capacities to apply knowledge in new situations, rather than recalling facts.

Another benefit of these sample question papers is to help identify and bridge learning gaps by spotlighting specific competencies.

This document stands as a strategic resource meant to mainstream competency-based assessment in middle and secondary stages of school education. It reflects a broader curricular transition, addresses the evolving demands for effective progression into higher grades.
